UHP Asymmetric Pattern Tyre Series 3D asymmetric pattern design takes superior grip performance and shorter braking distances.

# **Product Features**

Outside strong blocks design enables the tyre to follow the road's surface contours more closely, helps to reduce blocks deformation while speed cornering, and enhances steering precision & better grip.

Inside wide rib grooves ensures effective water dispersion. Sequential blocks design improves tread rib hardness, enhances braking performance.

Wide rib grooves effectively removes water, provides shorter braking distances and safer handling on wet roads.

Racing compound technology provides superior grip performance on wet road surfaces.

Outside strong blocks design enables the tyre to follow the road's surface contours more closely, helps to reduce blocks deformation while speed cornering, and enhances steering precision & better grip.

Inside wide rib grooves ensures effective water dispersion. Sequential blocks design improves tread rib hardness, enhances braking performance.

Wide straight grooves coupled with fine slots can effectively drain the water, damage the water film, shorten the braking distance and provide better wet control performance.

Racing compound technology provides superior grip performance on wet road surfaces.

Action and fashion, elegance and nobility, quality racing tyre with unidirectional pattern.

Optimum water dispersion and steering on both sides and minimum rolling resistance with the four longitudinal transverse grooves and radial

Lower road noise level and tranquil ride with the extra long tread grooves and fuzzy pattern.

Maximum grip and road adhesion with the pattern block and rib pattern on shoulders.

Strong rim-protecting ring to avoid impact for safe driving at high speed.

The special 3D solid pattern design is suitable to the cross-country vehicles on the whole road, with supreme anti-skip performance and extreme severe road passability.

# **Product Features**

The strong shoulder pattern design and unique wide pattern black provide extreme grip force and handing performance, which ensured the excellent safety handing performance and passability for the vehicle on any severe road condition.

The design of anti-collision wall in the sidewall prevents the puncture, road collision and pressure

High Performance Whole Road R/T Pattern Series

# **Product Features**

The design with anticollision rib improved the self-cleaning capability and avoid the stones clamped and improved the puncture

esistance of the tire.

The design with opened cross-grooves/shoulders with self-cleaning and grasp force, improved the trafficability on mud/damaged road.

The utilization with wave-shape steel plates greately improved the grasp force of the tire.

The design with toothmate pattern grooves makes the tires having better self-cleaning capability, and improved the grasp force and trafficability on damaged

The special 3D solid pattern design is suitable to the cross-country vehicles on the non-pavement road with supreme anti-skid performance on muddy road, powerful traction force and extreme grip performance.

# **Product Features**

The design of anticollision wall in the sidewall prevents the puncture, road collision and pressure damage.

The deep shoulder pattern design and wide pattern block provide extreme grip force, which ensured the excellent nandling and safety performance for the vehicle on the severe condition such as mountain and muddy

The ideal configuration of the pattern grooves and blocks and the high proportional horizontal grooves guaranteed the excellent anti-skid performance on the muddy road.

All weather comfortable and energy saving cross-country tyre.

# **Product Features**

Four broad longitudinal straight grooves match with creative wavy and pitching thin sipes, excellent performance on wet roads and stable steering performance.

The wide pattern block and transverse oblique grooves link broad longitudinal straight grooves, fuel-efficient, environmental and safety on driving.

The new outline and pitch design, as if across in a comfortable and tranquil city.

Rectangle shoulder and wide tread design with 3D multiple thin sipes provides superior traction, combines off-road capability in all conditions with on-road comfortable features.

# **Product Features**

Optimized pitching seauence blocks design offers auieter ride.

Rectangle shoulder and wide tread design with 3D multiple thin sipes increases road contact area, provides superior handling on both wet and dry surfaces, and enhances wear-resisting performance.

Wide pyramidal-shaped sipes for all-weather and various roads delivers excellent safety, maintains firm grip performance and aquaplaning resistance on wet roads, and enhances offroad steering response.

Unique lateral flange protector design enhances protection from puncture and impact damage

Tenacious and valiant with the HD819 cross-country pattern.

# **Product Features**

anti-puncture, underlay-damage and anti-fraction from the unique sidewall protection

Four wide longitudinal water-escaping grooves and spacious transverse water – escaping grooves water to improve water dispersion for excellent traction and braking on wet roads. Powerful with the luxurious SUV-oriented UHP tvre.

Outstanding performance on all roads with the wide tread and high groove—sipe ratio.

Tranquil ride with the ideal pitch design and the variable sound frequency blocks.

SUV H/T TYRES

# **Product Features**

Tenacious and valiant with the HD818 cross-country pattern.

Safety with wide tapered groove pattern applicable to all weather and various road conditions. Better country-crossing capability with its gripping power and anti-skid performance on wet roads.

Outstanding performance with high-strength steel cord and cap ply.

Tranquility with fuzzy arrangement of pattern block without specified peak and with variable sound frequency blocks.

Combined design with shoulder crosswise curve groves and lengthwise curves grooves provide good stability and safety of driving.

Design of lengthwise grooves with multiple angles provide excellent controlling and steering performance on the dry/wet road.

Strengthened design of carcass enhanced the load and impact capability of the tyre.

# **Product Features**

The design with strong shoulder blocks and unique decoupling longitude grooves provides high performance of stable steerability and irregular anti-wearing on various road condition.

The design with three wide longitude water outlet slots and balanced pattern blocks/slots enhances the water outlet performance on wet/slippy road and provides excellent steerability of the vehicle. The outstanding durability provides better mileage of driving. The load capacity is stable and excellent.

High quality, high performance, low carbon and eco-friendly pattern, modern green tyre.

New formula reduces 30%-40% of rolling resistance, decreases fuel consumption and  $\mathrm{CO_2}$  emission load.

Wide tread design increases road contact area, maintains safe ride, and enhances wear-resisting performance.

High ratio straight main sipes design effectively reduces rolling resistance and noise, perfectly combines environmental protection with comfort.

Pitching sequence shoulder blocks design shows outstanding controlling at high speed. Perfect distribution of lug type pattern with thin sipes in the tread enhances traction on wet roads.

Outside strong blocks design enables the tyre to follow the road's surface contours more closely, helps to reduce blocks deformation while speed cornering, and enhances steering precision & better grip.

Inside wide rib grooves ensures effective water dispersion. Sequential blocks design improves tread rib hardness, enhances braking performance.

Wide rib grooves effectively removes water, provides shorter braking distances and safer handling on wet roads.

Racing compound technology provides superior grip performance on wet

The design with widened and big pattern blocks enlarged the contacting area and rigidity, which effectively resisted the wearing, improved the service lift. The control-ability on dry/wet road and steer-ability is excellent.

The special design with gradient chamfer in grooves/blocks with better beauty to avoid the stone clamped, resisted the irregular wearing.

The alkene rubber matched with high structure wearing resistance V10H-UH carbon black, together with the new mixing technology and high wearing resistance receipt, meet the requirements on long milage performance.

The design with unique asymmetric pattern, three wide longitudinal water outlet slots and wide tread, ensures good water outlet performance ont wet/slippy road and the steerability on snow/icy road.

The big pattern block on tire external ensures good rigidity of the tire and provide good steerability.

The pattern design with multiple crossed coupling and waved 3D slot in the tire enhances the intake of snow, improved the strength of snow columns and provides powerful power to the vehicle in the winter.

All-seasons pcr tyres

Innovative radiation pattern groove design, with the optimal drainage channel and strong wetland grasping performance.

High density three-dimensional transverse serrated fine pattern design, improve the grasping performance in ice-smooth road.

The overall pattern design greatly improves the turning performance and traction on dry roads.

All-weather formula to match the reasonable tread strength to ensure the uniform wear of tire under the condition of cold and warm air.

Design with three longitudinal zigzag pattern grooves provides water drainage performance in wet road and excellent steer-ability on snow/ice road.

Design with big pattern block outside provides enough rigidity and excellent steer-ability.

Design with multiple crossed pattern inside enlarges snow holding capability and strength of snow column, and enhanced the grip capability.

The fine slots in the pattern reduced the hitting noise, the zigzag slots diffused the noise frequency, making the noise even in various frequency waves.

Special pattern design with single-direction and V style sipe provides excellent performance on ice and snow.

# **Product Features**

The wide design and pattern with new 3D sawtooth style fine sipe greatly improved the grasp area of the tread and effectively increased the grasp force of the tire on ice and snow.

The special sipe design with single direction and V shape increased the drainage performance of water and ice, improved the brake and control performance in winter on snow.

The materials such as silica etc are added in the tread compound; it is low-temperature resistance and features excellent adhesion force on the ire/snow.

# Safely Driving on Icy/Snow Pavement

The design of shoulder pattern with rectangular shape and integrated coupling style enhanced the load capability and stable steerability on icy/snow pavement.

The design with three lengthwise zigzag grooves provide better capability to outlet the water and snow, and it also improved the steerability in slippery condition.

The projected small sharp angle ensures the reliable contact of the tyre and the ground surface under low temperature, which also enhanced the arip capability.

The special design with directional pattern and various 3D steel sheets effectively enhanced the grasp capability on icy/snow pavement.

# **Product Features**

Zigzagging concave pattern for stable driving, flexible operation, long wearing and fuel saving.

Longer wearing and life with extra deep grooves and excellent tread compound.

Less distortion in the middle and late perilds with reinforced carcass.

# **Product Features**

Longitudinal straight main groove combines with the central tread block pattern design endows the tire outstanding anti-skid performance and grip performance on wet roads.

Robust block pattern for better anti-puncture, anti-cutting and traction, outstanding road adhesion, grip and stable at speed to balance a passenger car tire and a truck tire.

Solid and strong pattern, wear-resisting, outstanding operation.

Extra strong structure design ensures superior braking and steering response, fits in various road and weather conditions.

Whole block pattern in tires' shoulder and crown endows tires with irregular wear-resistance ability at same time effectively improve tires' braking performance.
